| | [K6_W01] Knows and understands, to an advanced extent, mathematics necessary to formulate and solve simple issues related to the field of study | Student defines the basic concepts of linear algebra and analytic geometry necessary to solve simple engineering problems in the domain of education. | [SW1] Assessment of factual knowledge |
| | [K6_U01] can apply mathematical knowledge to formulate and solve complex and non-typical problems related to the field of study and perform tasks, in an innovative way, in not entirely predictable conditions, by:n- appropriate selection of sources and information obtained from them, assessment, critical analysis and synthesis of this information,n- selection and application of appropriate methods and tools | Student uses basic notions and formulas of matrix and vector calculus. Student analyses a given problem from analytic geometry. Student uses complex numbers. | [SU4] Assessment of ability to use methods and tools |
