

Subject card

| Subject name and code | Mathematical Modelling Methods - project, PG_00047530 | | | | | | | | |
|---|---|---|---|------------|------------------------|---|---------|-----|--|
| Field of study | Automatic Control, Cybernetics and Robotics | | | | | | | | |
| Date of commencement of studies | October 2020 | | Academic year of realisation of subject | | | 2021/2022 | | | |
| Education level | first-cycle studies | | Subject group | | | Obligatory subject group in the field of study Subject group related to scientific research in the field of study | | | |
| Mode of study | Full-time studies | | Mode of delivery | | | at the university | | | |
| Year of study | 2 | | Language of instruction | | | Polish | | | |
| Semester of study | 4 | | ECTS credits | | | 1.0 | | | |
| Learning profile | general academic profile | | Assessment form | | | assessment | | | |
| Conducting unit | Department of Decision Systems and Robotics -> Faculty of Electronics, Telecommunications and Informatics | | | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | prof. dr hab. inż. Zdzisław Kowalczuk | | | | | | | |
| | Teachers | | prof. dr hab. inż. Zdzisław Kowalczuk | | | | | | |
| | | | dr inż. Marek Tatara | | | | | | |
| | | | dr inż. Janusz Kozłowski | | | | | | |
| | | at the outlast Notiowani | | | | | | | |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Project | t | Seminar | SUM | |
| | Number of study hours | 0.0 | 0.0 | 0.0 | 15.0 | | 0.0 | 15 | |
| | E-learning hours included: 0.0 | | | | | | | | |
| | Adresy na platformie eNauczanie: | | | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in classes include plan | | | | Self-study | | SUM | |
| | Number of study hours | 15 | | 1.0 | | 9.0 | | 25 | |
| Subject objectives | Getting acquainted with main problems of the mathematical modeling methods on the example of projects and practical tasks. | | | | | | | | |
| Learning outcomes | Course out | Subject outcome | | | Method of verification | | | | |
| | [K6_U04] can apply knowledge of programming methods and techniques as well as select and apply appropriate programming methods and tools in computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study | | Student is able to design software for the analysis and simulation of real world systems and control systems. | | | [SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment | | | |
| | [K6_U01] can apply mathematical knowledge to formulate and solve complex and non-typical problems related to the field of study and perform tasks, in an innovative way, in not entirely predictable conditions, by:n- appropriate selection of sources and information obtained from them, assessment, critical analysis and synthesis of this information,n-selection and application of appropriate methods and toolsn | | Student is able to analyze and synthesize mathematical models used to describe real world systems. | | | [SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information | | | |
| Subject contents | Explanation of exemplary problems discussed within the scope of the subject. Individual analysis of a given tasks. Development of a proposed solution to a given mathematical modeling problem, and preparation of a presentation of the obtained results. | | | | | | | | |

Data wydruku: 04.04.2024 18:28 Strona 1 z 2

| Prerequisites and co-requisites | | | | | |
|--|--|--|-------------------------------|--|--|
| Assessment methods and criteria | Subject passing criteria | Passing threshold | Percentage of the final grade | | |
| | Project completion and presentation | 50.0% | 100.0% | | |
| Recommended reading | Basic literature | Z. Kowalczuk, Mathematical Modelling Methods - course notes. E.A. Bender, An Introduction to Mathematical Modeling, Dover Publications, 2000. M. Tenenbaum, H. Pollard, Ordinary Differential Equations, Dover Publications, 1985. | | | |
| | upplementary literature • Scientific papers. | | | | |
| | eResources addresses | | | | |
| Example issues/ example questions/ tasks being completed | Simulation of dynamic systems described by continuous time differential equations using suitable numerical algorithms. | | | | |
| Work placement | Not applicable | | | | |
